

FACILITIES DEVELOPMENT MANUAL

Wisconsin Department of Transportation

TABLE OF CONTENTS

Chapter 11: Design

Section 11-1 Introduction

11-1-1Application of Standards
1.1Originator
1.2General
11-1-2Exceptions to Standards
2.1General
2.2Applicability
2.3Controlling Criteria
2.4Approval Authority
2.5Procedure
2.6Content of Request
2.6.1Cover Sheets
2.6.1.1 Transmittal Letter
2.6.1.2 Title Sheet
2.7Metrics and Exceptions to Standards
2.8Endnotes
Attachment 2.1Exceptions to Standards Approval Flowchart
Attachment 2.2Exceptions to Standards: Sample Transmittal Letters & Title Sheet
11-1-3Metrics and Design
3.1Introduction
3.2The Basics
3.3Terminology
3.3.1Special Units
3.3.2Derived Units
3.3.3Multiplication Factors
3.4Conversion Factors
3.5Conversion Guidelines
3.5.1General
3.5.2Significant Digits
3.5.3Rounding and Precision
3.5.3.1 Counts vs. Measurements
3.5.3.2 Rounding Values
3.6Writing Conventions
3.6.1Names and Symbols
3.6.2Numbers
3.7Metric Drafting Standards
11-1-4Programmatic Exception to Standards
4.1Overview
4.2Safety Screening Analysis
4.2.1Application
4.2.2Timing
4.2.3The Process
4.3Accelerated Design Process
Attachment 4.1Programmatic Exception to Standards Report
Attachment 4.2Safety Screening Analysis and Accelerated Design Flow Charts
Attachment 4.3Glossary of Items
Attachment 4.4Sample Metamanager Safety Spreadsheet
Attachment 4.5Improvement Flag Problem Descriptions
Attachment 4.6Safety Screening Worksheet

[Attachment 4.7](#).....Crash Report Analysis Worksheet

[Attachment 4.8](#).....Suggested Step 3 Process

Section 11-3 Community Sensitive Design

[11-3-1](#)Policy & Principles

[1.1](#).....General

[1.2](#).....Design Policy: “Design Excellence Through Community Sensitive Design”

[1.3](#).....A Changing Context For Transportation

[1.4](#).....Outcomes of Community Sensitive Design

[1.5](#).....Principles of Community Sensitive Design

[1.5.1](#)Involve Customers and Stakeholders Early and Continuously

[1.5.2](#)Use an Interdisciplinary Project Development Approach

[1.5.3](#)Emphasize Good Project Management

[1.5.4](#)Be Sensitive To Environmental Issues

[1.5.5](#)Provide an Aesthetically Pleasing Quality Product

[1.5.6](#)Provide Safe and Efficient Facilities

[1.5.7](#)Deliver Quality Projects On Time and Within Budget

[11-3-5](#)Decision Making Guidance

[5.1](#).....Introduction

[5.2](#).....Decision Making Steps

[5.3](#).....Project Information, Data Collection and Analyses

[5.3.1](#)Project Information

[5.3.1.1](#) Type of construction

[5.3.1.2](#) Roadway Functional Classification

[5.3.1.3](#) Type of Terrain

[5.3.1.4](#) Project Design Speed

[5.3.2](#)Data Collection

[5.3.2.1](#) Existing and Projected Traffic Volumes

[5.3.2.2](#) Operating Speeds

[5.3.2.3](#) Crash History

[5.3.2.4](#) Roadside Conditions

[5.3.2.5](#) Pavement Friction

[5.3.3](#)Analyses

[5.3.3.1](#) Operating Speed Analysis

[5.3.3.2](#) Crash History Analysis

[5.3.3.3](#) Traffic Capacity and Level of Service Analysis

[5.4](#).....Things to Consider When Making Decisions on Design Criteria

[Attachment 5.1](#).....CSD Considerations for Horizontal Alignment

[Attachment 5.2](#).....CSD Considerations for Vertical Alignment

[Attachment 5.3](#).....CSD Considerations for Stopping Sight Distance

[Attachment 5.4](#).....CSD Considerations for Intersection Sight Distance

[Attachment 5.5](#).....CSD Considerations for Passing Sight Distance

[Attachment 5.6](#).....CSD Considerations for Decision Sight Distance

[Attachment 5.7](#).....CSD Considerations for Cross Section (Lane)

[Attachment 5.8](#).....CSD Considerations for Cross Section (Shoulder)

[Attachment 5.9](#).....CSD Considerations for Cross Section (Medians)

[Attachment 5.10](#)....CSD Considerations for Cross Section (Roadside)

[Attachment 5.11](#)....CSD Considerations for Intersections

[Attachment 5.12](#)....CSD Considerations for Access Control

[Attachment 5.13](#)....CSD Considerations for Pedestrian/Bicycle Accommodations

[Attachment 5.14](#)....CSD Considerations for Bridges

Section 11-5 General Design Considerations

[11-5-1](#)Scope of Construction Projects

[1.1](#).....Discussion

[11-5-3](#)Highway Capacity

[3.1](#).....General

[3.2](#).....Congestion and LOS

[3.3](#).....Incremental Improvements for Non-Interstates and Non-Freeways

- [3.4](#).....Incremental Improvements for Interstates and Freeways
- [3.5](#).....Level of Service Analysis
 - [3.5.1](#)Design Hour Volume
 - [3.5.2](#)Peak Hour Factor (PHF)
 - [3.5.3](#)Percent Heavy Vehicles in the Design Hour
 - [3.5.4](#)Driver Population Factor
 - [3.5.5](#)Rural Roadway Conditions
 - [3.5.6](#)Urban Roadway Conditions
 - [3.5.7](#)Intersection Control Conditions
- [3.6](#).....Level of Service Evaluation for Environmental Documentation
- [3.7](#).....Traffic Analysis Software
 - [3.7.1](#)WisDOT Supported Traffic Analysis Software
 - [3.7.2](#)Traffic Analysis Software Selection Decision Aid
 - [3.7.3](#)Traffic Analysis Data Requirements
 - [3.7.3.1](#)Data Requirements for Surface Street Analysis
 - [3.7.3.2](#)Data Requirements for Freeway System Analysis
- [11-5-5](#).....Access Control
 - [5.1](#).....Spacing
 - [5.2](#).....Intersecting Roadways
 - [5.3](#).....Interchange Areas [1]
 - [5.3.1](#)Access Control on Interchange Crossroad
 - [5.3.2](#)Access Control Along an Expressway at an Interchange
 - [5.4](#).....Traffic Impact Analysis
 - [5.5](#).....References
 - [Attachment 5.1](#).....Access Spacing Guidelines
 - [Attachment 5.2](#).....Access Control for Typical Interchange
- [11-5-10](#).....Earthwork
 - [10.1](#).....Preliminary Design
 - [10.2](#).....General Considerations
 - [10.3](#).....Project Scheduling
 - [10.4](#).....Total Volume Concept for Project Earthwork.
 - [10.5](#).....Borrow
 - [10.6](#).....Earthwork Quantities
 - [10.7](#).....Earthwork Computations
 - [10.8](#).....Excess Incidental Excavation
 - [10.9](#).....Soil Compaction
 - [10.10](#).....Bridge Approach Embankments
 - [Attachment 10.1](#)....Earthwork Calculation Examples
 - [Attachment 10.2](#)....DM 11-5 Attachment 10.2 Compaction of Soils
 - [Attachment 10.3](#)....DM 11-5 Attachment 10.3 Bridge Approach Construction Techniques
- [11-5-15](#).....Select Materials in Subgrades
 - [15.1](#).....Policy
 - [15.2](#).....Application
 - [15.3](#).....Design
 - [15.4](#).....Other Design Considerations
 - [Attachment 15.1](#)....Areas for Inclusion of Select Materials
 - [Attachment 15.2](#)....Standard Select Materials Systems
 - [Attachment 15.3](#)....Typical Half Section With Select Materials
 - [Attachment 15.4](#)....Typical Half Section With Select Materials, 4-Lane Divided Highway, 50 ft Median
 - [Attachment 15.5](#)....Typical Half Section With Select Materials, 4-Lane Divided Highway, 60 ft Median
 - [Attachment 15.6](#)....Median Drain Detail for Select Materials Layer Greater Than cmax
 - [Attachment 15.7](#)....Typical Section for 1-Lane Ramp With Select Materials

Section 11-10 Design Controls

- [11-10-1](#)Basic Criteria
 - [1.1](#).....Design Year
 - [1.2](#).....Traffic
 - [1.3](#).....Highway Capacity

[Attachment 5.14](#).... Sample Problem - Intersection Sight Distance
[Exhibit 5.1](#)Superelevation Tables (emax = 4% and 6%)

Section 11-15 Cross-section Elements for Rural Highways and Freeways

[11-15-1](#)Dimensions and Design Classes [updated 7/11](#)

- [1.1](#).....Desirable and Minimum Design Criteria
- [1.2](#).....Railroad Crossings
- [1.3](#).....Cross Slope
- [1.4](#).....Shoulders
 - [1.4.1](#) Shoulder Paving Policy
- [1.5](#).....Auxiliary Lanes
- [1.6](#).....Subgrade Width
- [1.7](#).....Side Slopes
- [1.8](#).....Side Ditches
- [1.9](#).....Clear Zone, Horizontal Clearance, and Clear Roadway Width of Bridges
 - [1.9.1](#)Clear Zone [2]
 - [1.9.1.1](#) Clear Zone and Driveways, Side Roads and Median Crossovers
 - [1.9.1.2](#) Clear Zone and Side Slopes [2]
 - [1.9.2](#)Horizontal Clearance [5,6]
 - [1.9.2.1](#)Horizontal Clearance - Lateral Underclearance to Structure [6]
 - [1.9.2.2](#)Horizontal Clearance - Lateral Clearance [1]
 - [1.9.2.3](#)Lateral Clearance for Rural (Shoulder) Roadways
 - [1.9.2.4](#)Lateral Clearance vs. Other Required Offsets
 - [1.9.2.5](#)Lateral Clearance and Mailboxes
 - [1.9.3](#)Clear Roadway Width of Bridges [6]
 - [1.9.4](#)Hazardous Mailboxes
- [1.10](#).....Median
 - [1.10.1](#)Median Width for Rural Highways
 - [1.10.2](#)Intersections
 - [1.10.3](#)Median Ditches
 - [1.10.4](#)Median Crossovers for Freeways
 - [1.10.5](#)Median Barrier
- [1.11](#).....Transition From Divided to Two-Way Roadways
- [1.12](#).....Marsh Section
- [1.13](#).....Local Service
- [1.14](#).....Rural Driveways and Entrances
- [1.15](#).....References

[Attachment 1.1](#).....Design Criteria for Rural State Trunk Highways Functionally Classified as Arterials
[Attachment 1.2](#).....Design Criteria for Rural State Trunk Highways Functionally Classified as Collectors

[Attachment 1.4](#).....Minimum Design Standards for Town Roads (New Construction Only)
[Attachment 1.5](#).....Rural State Trunk Highway Paved Shoulder Width Requirements
[Attachment 1.6](#).....Typical Cross Sections for Rural 2-Lane Highways
[Attachment 1.7](#).....Typical Cross Sections for Divided Highways and 1-Lane Ramps
[Attachment 1.8](#).....Roadway Sections in Rock Cut
[Attachment 1.9](#).....Clear Zone Distance Tables & Recovery Area Width Determination
[Attachment 1.10](#)....Horizontal Curve Correction Factor
[Attachment 1.11](#)....Ditch Traverseability Evaluation Charts
[Attachment 1.12](#)....Typical 2- to 4-Lane Transition
[Attachment 1.13](#)....Typical Marsh Sections
[Attachment 1.14](#)....Typical Driveway Cross Section and Profiles
[Attachment 1.15](#)....Lateral Clearance on Rural Roadway
[Attachment 1.16](#)....Design Criteria for County Trunk Highways Functionally Classified as Arterials
[Attachment 1.17](#)....Design Criteria for County Trunk Highways Functionally Classified as Collectors
[Attachment 1.18](#)....Design Criteria for County Trunk Highways Functionally Classified as Local Roads

[11-15-5](#)Design Criteria for the Great River Road

- [5.1](#).....Introduction
- [5.2](#).....Design Standards

- [5.3](#).....Shoulder Width
 - [5.3.1](#) Graded Width of Shoulder
 - [5.3.2](#) Paved Shoulder Width
- [5.4](#).....Special Design Features
- [5.5](#).....Application of Standards
- [Attachment 5.1](#).....Great River Road Map
- [11-15-10](#)Passing Lanes and Climbing Lanes
 - [10.1](#).....Passing Lanes
 - [10.1.1](#)Application Criteria
 - [10.1.1.1](#) ..Access Control
 - [10.1.1.2](#) ..Passing Lane Corridors
 - [10.1.1.3](#) ..Location
 - [10.1.1.4](#) ..Traffic Volumes
 - [10.1.2](#)Design Criteria
 - [10.1.2.1](#) ..Lane Width and Shoulder Width
 - [10.1.2.2](#) ..Clear Zone
 - [10.1.2.3](#) ..Passing Lane Length
 - [10.1.2.4](#) ..Spacing Between Passing Lane Sections
 - [10.1.2.5](#) ..Taper Lengths, Locations and Signal Location
 - [10.1.2.6](#) ..Signing and Pavement Marking
 - [10.1.2.6.1](#)..... Pavement Marking
 - [10.2](#).....Climbing Lanes
 - [10.2.1](#)Design Criteria
 - [10.2.1.1](#) ..Lane width and shoulder width
 - [10.2.1.2](#) ..Clear Zone
 - [10.2.1.3](#) ..Taper Lengths and Locations
 - [10.2.1.4](#) ..Signing and Pavement Marking
 - [10.2.1.4.1](#)..... Pavement marking
- [10.3](#).....References
- [Attachment 10.1](#).....Rural STH Passing Lane Corridors
- [Attachment 10.2](#).....Warrant for Considering Passing Lanes

Section 11-20 Cross Section Elements for Urban Highways

- [11-20-1](#)Dimensions and Design Classes [updated 10/11](#)
 - [1.1](#).....Cross Slope
 - [1.2](#).....Curb or Curb and Gutter
 - [1.2.1](#)General Curb Design Information
 - [1.2.2](#)Low Speed Urban Roadways
 - [1.2.3](#)Transitional Roadways
 - [1.2.3.1](#)Undeveloped Areas:
 - [1.2.3.2](#)Developing Areas:
 - [1.2.3.3](#)Developed Areas:
 - [1.2.4](#)High Speed Urban Roadway
 - [1.3](#).....Desirable and Minimum Design Criteria
 - [1.3.1](#)Low Speed Urban Roadways
 - [1.3.2](#)Transitional and High-Speed Urban Roadways
 - [1.4](#).....Medians
 - [1.4.1](#)Curbed Medians
 - [1.4.2](#)Flush Medians
 - [1.4.3](#)Low Speed Urban Roadways
 - [1.4.4](#)Transitional And High Speed Urban Roadways
 - [1.5](#).....Travel Lanes
 - [1.6](#).....Auxiliary and Parking Lanes
 - [1.6.1](#)Angle Parking
 - [1.6.2](#)No Parking
 - [1.7](#).....Borders
 - [1.8](#).....Slopes and Ditches
 - [1.9](#).....Clearances for Urban Roadways

- [1.9.1](#) Lateral Clearance for Urban Roadways
- [1.9.2](#) Clear Zone for Urban Roadways
- [1.9.3](#) Additional Guidance for Treatment of Fixed Objects - Low Speed Urban (40 mph posted speed or less), With or Without Parking
- [1.9.4](#) Additional Guidance for Treatment of Fixed Objects - Transitional (45 mph posted speed) and High-Speed Urban (50 mph posted speed or greater)
- [1.9.5](#) Traffic Signal Supports
- [1.9.6](#) Railroad Warning Signs and Signals

 - [1.6](#).....References
- [11-26-5](#)Design Process and Qualifications [updated 2/11](#)
 - [5.1](#).....Roundabout Design Process and Qualifications
 - [5.2](#).....Roundabout Designer Requirements
 - [5.3](#).....Intersection Control Evaluation, Program Level Scoping phase.
 - [5.4](#).....The 3-Stage Roundabout Design Process
 - [5.4.1](#) Stage 1, Roundabout Design Process
 - [5.4.2](#) Stage 2, Roundabout Design Process

5.4.3 Stage 3, Roundabout Design Process

5.5..... Roundabout Criteria

[11-26-10](#) Multimodal Considerations [updated 2/11](#)

10.1..... Pedestrian and Bicyclist Accommodations

10.1.1 Pedestrians

10.1.2 Bicyclists

10.2..... Transit, Large Vehicle and Emergency Vehicle Considerations

10.2.1 Transit

10.2.2 Large and Oversized Overweight (OSOW) Vehicles

10.2.3 Emergency Vehicles

10.3..... References

[11-26-15](#) Agency and Public Coordination..... [updated 2/11](#)

15.1..... Public Awareness

15.2..... Public Meetings

15.3..... Informational Brochures, Videos, and Web Site

15.4..... Social, Environmental, and Economic Considerations

15.5..... References

[11-26-17](#) Access Control

17.1..... Access Management

17.2..... Functional Intersection Area

17.3..... Corner Clearance and Driveway Location Considerations

17.4..... Interchange Ramps

[11-26-20](#) Operations..... [updated 2/11](#)

20.1..... Design References and Methods

20.2..... Roundabout Operation

20.2.1 Space Requirements and Capacity Limitations

20.3..... Roundabout Capacity

20.3.1 Single-lane Roundabout Entry Capacity

20.3.2 Single Lane Exit Capacity

20.3.3 Multilane Roundabout Capacity

20.3.4 Pedestrian Effects on Entry and Exit Capacity

20.4..... Operational Analysis Tools

20.5..... Key Roundabout Parameters Affecting Operating Capacity

20.6..... Rodel Software

20.6.1 Entry Width

20.6.2 Roundabout Performance Measures

20.6.3 Testing for Weaknesses in Geometry and Capacity

20.6.4 Testing for Exclusive Lane performance and Lane by Lane Performance

20.6.5 Volume Diagram and Lane Configuration Sketch

20.7..... Operations and Entry Lane Pavement Markings

20.8..... Through Highway Declaration (ss 340.01(67) & 349.07)

20.9..... Speed Zone Declarations (ss 346.57 & 349.11)

20.10..... References

[11-50-35](#)Concrete Barrier Temporary Precast in Work Zone

- [35.1](#)..... Introduction
- [35.2](#)..... Factors to Consider
- [35.3](#)..... Guidelines for CBTP Use
- [35.4](#)..... CBTP Anchoring Requirement/Deflection Distance
- [35.5](#)..... Intersection Sight Distance
- [35.6](#)..... CBTP End Treatments
 - [35.6.1](#) Clear zone
 - [35.6.2](#) Barrier Flare
 - [35.6.3](#) Construction Work Operations and Traffic Stage Switches Near Flared Barrier
 - [35.6.4](#) Crash Cushion or Sand Barrels.
- [11-50-40](#) Law Enforcement in Work Zones..... [updated 12/11](#)
 - [40.1](#)..... General
 - [40.2](#)..... Type of Facility
 - [40.3](#)..... Type of Work
 - [40.4](#)..... Support Services for Work Zone Mitigation
- [11-50-45](#) Pavement Marking
- [11-50-50](#) Signals..... [updated 12/11](#)
 - [50.1](#)..... General
 - [50.2](#)..... Traffic Signal Investigation
 - [50.3](#)..... Design Standards
- [11-50-55](#) Signing
 - [55.1](#)..... General
 - [55.2](#)..... Reflective Sheeting For Highway Signs
- [11-50-60](#) Lighting
 - [60.1](#)..... General

Section 11-52 Traffic Engineering and Operations

- [11-52-1](#) Intelligent Transportation Systems (ITS) Guidance
- [11-52-5](#) Traffic Guidelines Manual (TGM)
- [11-52-10](#) Traffic Signal Design Manual (TSDM)

Section 11-55 Special Features

- [11-55-1](#) Boat Ramps
 - [1.1](#)..... Site Layout
 - [1.2](#)..... Launching Ramps
 - [1.3](#)..... Parking Lots
 - [1.4](#)..... Miscellaneous Design
 - [Attachment 1.1](#)..... Boat Ramp Details
 - [Attachment 1.2](#)..... Pier Details
 - [Attachment 1.3](#)..... Boat Ramp Example Parking Layouts
 - [Attachment 1.4](#)..... Boat Ramp Example Parking Layouts
- [11-55-3](#) Timber Management
- [11-55-5](#) Retaining Walls
 - [5.1](#)..... General
 - [5.2](#)..... Minor Retaining Wall
 - [5.3](#)..... Barriers On Top Of Retaining Walls
 - [5.4](#)..... Right-Of-Way Requirements
- [11-55-10](#) Cattle Pass Design
 - [10.1](#)..... General
 - [10.2](#)..... Criteria
 - [10.2.1](#) On New Grading Sections
 - [10.2.2](#) Non-grading Situations:
 - [10.2.3](#) Documentation
 - [10.3](#)..... Design Guidelines
 - [10.4](#)..... Other Considerations
 - [Attachment 10.1](#)..... Documentation for Cattle Pass
- [11-55-15](#) Permanent Public Trails Crossing Rural Public Roads..... [updated 10/11](#)
- [11-55-20](#) Overhead Sign Supports
 - [20.1](#)..... General

- [20.1.1](#) Sign Bridges
- [20.1.2](#) Subsurface Investigation and Information
- [20.2](#)..... Design Limitations
- [20.3](#)..... For Overhead Sign Supports with Type 1 or Type 2 Signs:
- [20.4](#)..... Design Guidelines
- [20.5](#)..... Roadside Design Guidelines
- [Attachment 20.1](#).... Sign Support Base Design Process
- [Attachment 20.2](#).... Full Span Overhead Sign Support Base Adequacy Check

Section 11-60 Detours

- [11-60-1](#) General
- [11-60-5](#) Interim Liquidated Damages
 - [Attachment 5.1](#)..... Sample Calculation to Determine Average Car Operating Cost
 - [Attachment 5.2](#)..... Sample Calculation of Interim Liquidated Damages
- [11-60-10](#) Detours/Construction Under Traffic
 - [10.1](#)..... General
