TABLE OF CONTENTS

Chapter 13	DRAINAGE
------------	----------

	<u>Procedure Number</u>
SECTION 1 - DRAINAGE PRACTICE	
Subject 1 - Introduction	13-1-1
Subject 5 - Major Drainage Guidelines And Criteria	13-1-5
Subject 10 - Documentation Of Hydrologic/Hydraulic Design	13-1-10
Subject 15 - Culvert Materials Selection Standard	13-1-15
Subject 17 - Storm Sewer Materials Selection Standard	13-1-17
Subject 20 - Large Drainage Conduit	13-1-20
Subject 21 - Precast Box Culverts	13-1-21
Subject 25 - Fill Height Tables	13-1-25
SECTION 5 - FIELD WORK	
Subject 1 - Field Surveys And Reviews	13-5-1
SECTION 10 - HYDROLOGY	
Subject 1 - Design Criteria	13-10-1
Subject 5 - Methods Of Determining Peak Runoff	13-10-5
Subject 10 - Hydrograph Development And Routing	13-10-10
SECTION 15 - HYDRAULIC DESIGN OF CULVERTS	
Subject L - Economic Analysis	13-15-1
Subject 5 - Design Criteria	13-15-5
Subject 10 - Culvert Hydraulics	13-15-10
Subject 15 - Special Hydraulics	13-15-15
SECTION 20 - HYDRAULIC DESIGN OF BRIDGES	
Subject 1 - Design Methods	13-20-1
SECTION 25 - STORM SEWER DESIGN	
Subject 1 - Introduction	13-25-1
Subject 5 - Basic Drainage Area Information	13-25-5
Subject 10 - Field Information	13-25-10
Subject 15 - Preliminary Layout Of System	13-25-15
Subject 20 - Design Discharge	13-25-20
Subject 25 - Gutter Design	13-25-25
Subject 30 - Hydraulic Design Of Inlets	13-25-30
Subject 35 - Hydraulic Design Of Storm Sewers	13-25-35
Subject 40 - Design Procedure: Full And Partially Full Flow	13-25-40
Subject 45 - Design Procedure: Surcharged Full Flow	13-25-45

	<u>Procedure Number</u>
SECTION 30 - CHANNELS AND ROAD DITCHES	
Subject 1 - Channel Types	13-30-1
Subject 5 - Channel Characteristics	13-30-5
Subject 10 - Hydraulic Design Of Open Channels	13-30-10
SECTION 35 - EROSION WATER POLLUTION CONTROL	
Subject 1 Special Hydraulic Structures	13-35-1
SECTION 40 - SUBGRADE DRAINAGE	
Subject 1 - Underdrains	13-40-1
SECTION 45 - APPENDIX	
Subject 1 - Glossary Of Terms	13-45-1

List of Figures

Procedure	Figure	Title
13-1-5	1	Drainage Data Requirements, Design Aids & Computer Software
	2	Major Drainage Summary Sheet
13-1-15	1	Potential for Bacterial Corrosion of Zinc Galvanized Steel Culvert Pipe (map)
13-1-25	1	Storm Sewer Fill Height Table (English)
	2	Fill Height Table-Corrugated Steel, Aluminum, & Polyethylene and Reinforced Concrete Pipe, HS20 Loading, 2 2/3" x 1/2" Corrugations
	3	Fill Height Tables: Corrugated Steel Pipe, 3" x 1" Corrugations; and Structural Plate Pipe, 6" x 2" Corrugations
	4	Fill Height Tables: Corrugated Steel Pipe Arch, 2 2/3" x 1/2" Corrugations; and Corrugated Steel Pipe Arch, 3" x 1" Corrugations
	5	Fill Height Table, Structural Plate Pipe Arch, 6" x 2" Corrugations
	6	Fill Height Tables: Corrugated Aluminum Pipe, 3" x 1" Corrugations and Aluminum Alloy Structural Plate Pipe, 9" x 2 1/2" Corrugations
	7	Fill Height Table, Corrugated Aluminum Pipe Arch, 2 2/3" x 1/2" Corrugations
	8	Fill Height Table, Aluminum Alloy Structural Plate Pipe Arch, 9" x 2 1/2" Corrugations
	9	Fill Height Table, Reinforced Concrete Arch and Elliptical Pipe (all sizes); and Dimensions for Reinforced Concrete Arch and Elliptical Pipe (English)
13-10-1	1	Flood Design Frequency Selection Chart
	2	Probability of Flood Occurrence (table)
	3	Probability of Flood Damage Before Payment of 25-Year Mortgage
13-10-5	1	Area Limits for Peak Discharge Methods
	2	Runoff Coefficients (C), Rational Formula; and Runoff Coefficients for Specific Land Uses
	3	Time of Concentration of Small Drainage Basins (nomograph)
	4	Rainfall Intensity-Duration-Frequency Curves
	5	Contour Map for Example Problem
	6	Runoff Curve Numbers for SCS-TR55 Method
	7	TR-55 Graphical Discharge Method (example)
	8	Discharge Frequency Graph (example)
13-10-10	1A	Basic Watershed Data Work Sheet
	1B	Basic Watershed Data Work Sheet (example)
	2A	Hydrograph Development Work Sheet
	2B	Hydrograph Development Work Sheet (example)
	3	Sample Hydrograph
	4	Headwater Depth Nomograph
	5	Depth-Outflow Graph (example)
	6A	Storage Indicator Curve Work Sheet
	6B	Storage Indicator Curve Work Sheet (example)
	7	Storage-Indicator Curve (example)
	8	Stage-Storage Curve (example)
9A	Hydrograph Data Work Sheet	
9B	Hydrograph Data Work Sheet (example)	
10	Hydrograph (example)	
11	Example Problem Illustration	

Procedure	Figure	Title
13-15-5	1	Entrance Loss Coefficients (K_e) for Culverts
13-15-10	1	Energy Losses Through a Conduit (schematic)
	2	Inlet and Outlet Control Problem Sample Work Sheets
	3	Culvert Hydraulic Performance Curves (examples)
13-20-1	1	Types of Flow Encountered at Bridges
13-25-1	1	Storm Sewer Design Flow Chart
13-25-25	1	Gutter Design Nomograph
	2	Gutter Design Example
13-25-30	1	Reduction Factors for Inlets
	2	Performance Curves for Slotted CMP Surface Drains
13-25-35	1	Manning Roughness Coefficients
	2	Graphic Solution of the Manning Equation
	3	Hydraulic Elements of a Circular Section
	4	Capacity and Velocity Diagram for Circular Corrugated Pipe Flowing Full ($n = 0.024$)
	5	Capacity and Velocity Diagram for Circular Concrete Pipe Flowing Full ($n = 0.013$)
	6	Sewer Bend Loss Coefficients
	7	Loss Coefficients for Miter Bends
13-25-40	1	Work Sheet for Storm Sewer Design
	2	Full and Partially Full Flow Sewer Design Problem
13-25-45	1	Energy and Hydraulic Grade Lines for a Properly and Improperly Designed Storm Sewer
	2	Work Sheet for Storm Sewer Design
	3	Work Sheet for Sewer Design Problem
13-30-10	1	Permissible Velocities for Riprap Lined Ditches
	2	Degrees of Vegetal Retardance
	3	Energy in Gradually Varied Open-Channel Flow
	4	Table of Allowable Velocities in Ditches; and Suggested Treatment Warrants for Channels
	5	Recommended Permissible Velocities for Unlined Channels
	6	Drainage Channel Lining Design Problem
	7	Drainage Channel Lining Design Work Sheet
	8	Sample Design of Rock Riprap Lining for Steep Trapezoidal Channel Sides
	9	Definition Sketch for Flow in Bends
	10	Sample of Rock Riprap Design for Flow in Bends
13-35-1	1	Dissipater Limitations
	2	Recommended Configuration of Riprap Blanket Subject to Maximum and Minimum Tail Waters
	3	Culvert Outlet Erosion Protection, Lined Channel Expansions
	4	Example Problem, Lined Channel Expansion Design
	5	Typical Outlet Expansion Diagram
	6	Length Requirements for Expanded Pipes
13-40-1	1	Subdrains
	2	Suggested Depth and Spacing of Underdrains for Various Soil Types
