(See Attached Maps)

May 14th PCC Profiler Approval Testing
7:00 AM to 5:30 PM (When Completed)
Where West end of new Hwy 151 Bypass (Closed to traffic)
(See Attached Maps)

Please e-mail (terry.treutel@dot.state.wi.us) or call me (608-246-5393, cell 608-516-6360) to schedule testing and let me know if you are seeking approval for HMA, PCC or both.

Note: Single Point Laser Devices are not eligible for approval on PCC Pavement.

All profilers will be required to make five runs on each test section for which approval is requested.

All five runs will be analyzed using the ProVAL Software Profiler Certification Module to determine the Equipment Repeatability and Accuracy. A score of 92 percent or greater for repeatability and 90 percent or greater for accuracy is required for approval of a profiler for each pavement type for which approval is requested. An electronic copy of the Profiler settings used for approval testing will be required for inclusion on the Approved Profiler List.

Single sensor profilers capable of measuring a single wheel path will only be required to test one wheelpath of a lane.

Portable devices that can be transferred to different vehicles must demonstrate satisfactory test results for each host vehicle for which approval is requested.
